Uyen Do
Frontend Developer

Phone: (+84) 938822524
Email: uyendo.0203@gmail.com
Address: Khuong Viet street, Tan Phu, HCM

SUMMARY

A passionate Frontend Developer with 6 years of experience in creating intuitive and user-friendly web applications. I excel in teamwork and prioritize customer satisfaction. My expertise includes HTML, CSS, JavaScript frameworks, and optimizing user experiences for web applications. I am dedicated to building effective interfaces that meet modern web standards.

EDUCATION

Colleges - University of Science *(HCMUS)*
Time: 2013-2016
Major: Information Technology

Web Design Skills Certificate *(Informatics Center - HCMUS)*
Graduated magna cum laude in Web Design.

EXPERIENCE

Bluesky Technology
Front-End Developer
November 2023 - Now

- Developed and maintained web applications using modern frontend technologies including Next.js, React, TypeScript, and Material-UI for various client projects in retail and hospitality sectors.
- Collaborated with cross-functional teams including UI/UX designers, backend developers, and product managers to deliver high-quality software solutions that meet client requirements and business objectives.
- Implemented responsive and accessible user interfaces following modern web standards and best practices, ensuring optimal user experience across desktop and mobile devices.
- Built reusable component libraries and design systems to maintain consistency across multiple projects and improve development efficiency within the team.
- Integrated RESTful APIs and managed application state using modern state management solutions (Zustand, Context API) to create seamless data flow between frontend and backend systems.
- Implemented internationalization (i18n) features supporting multiple languages to enable global market expansion for client applications.
- Optimized application performance through code splitting, lazy loading, memoization techniques, and efficient rendering strategies to ensure fast load times and smooth user interactions.
- Conducted code reviews and participated in technical discussions to maintain high code quality standards and share knowledge with team members.

- Participated in agile development processes including sprint planning, daily standups, and retrospectives to ensure timely project delivery and continuous improvement.
- Debugged and resolved technical issues in production environments, implementing monitoring and error tracking solutions to maintain application stability.

TMRW Vietnam
Front-End Developer
January 2022 - 2023

- Managed multiple projects simultaneously, designing engaging websites in collaboration with graphic designers and back-end developers.
- Developed user interfaces for applications, focusing on smooth and intuitive user experiences.
- Implemented smooth animation effects using GSAP, enhancing interactivity and user engagement.
- Conducted user research and behavior analysis to identify pain points in the user experience, proposing design solutions accordingly.
- Designed UI components (buttons, forms, modals) according to UI standards, ensuring consistency and usability.
- Developed and maintained front-end functionality for various web applications.
- Participated in creating websites from scratch.
- Developed AR/3D features using the 8th Wall platform to showcase AR models and enable customization.
- Set up GA4 and Google Tag Manager for analytics.
- Integrated APIs and interacted with data from Directus CMS (Headless CMS).
- Ensured SEO optimization for CSR and SSR frontend frameworks.

Minerva Solution
Front-End Developer
December 2020 - December 2021

- Performed maintenance and updates for existing client websites.
- Built the core structure of ReactJS applications and HTML components.
- Wrote cross-browser compatible HTML, CSS, and JavaScript.
- Configured the build process for products and supported deployment.
- Collaborated with the design team to refine UI/UX designs.
- Engaged in creating websites from scratch and supporting API/JSON templates with the back-end team.

Apps Cyclone Co., LTD
Front-End Developer
2017 - June 2019

- Optimized website performance through efficient coding practices and image handling.
- Engaged in creating websites from scratch and converting designs from PSD/Illustrator/Figma to HTML layouts.
- Collaborated with back-end teams to support API/JSON templates.
- Developed cross-browser compatible HTML, CSS, and JavaScript.

HIGHLIGHT PROJECTS

- **Coffee Shop Management System:**
  - ○ **Technical Skills Applied**:
    - ■ **Technology**: Next.js, React, TypeScript,Zustand, Material-UI, HTML5, CSS3, JavaScript ES6+.
    - ■ **State Management**: Zustand, React Context API, Custom Hooks
  - ○ **Description:**
    - ■ Developed comprehensive admin dashboard for multi-branch coffee shop operations
    - ■ Implemented real-time order management, inventory tracking, and customer management features
    - ■ Created role-based access control system with different permission levels
    - ■ Built advanced filtering, pagination, and reporting capabilities
    - ■
    - ■ Tools & Libraries: React Hook Form, i18next, Axios, React Query
    - ■ Development Practices: Responsive Design, Component-Driven Development, Performance Optimization, Code Review
    - ■ Achievements:
    - ■ Improved development efficiency by 30% through creation and implementation of reusable component libraries across multiple projects.
    - ■ Reduced code maintenance overhead by implementing TypeScript and establishing consistent coding standards within the development team.
    - ■ Enhanced user experience by implementing internationalization features that enabled client applications to expand into new markets.
    - ■ Contributed to successful project deliveries that resulted in high client satisfaction and repeat business for BlueSky Technology.

- *TMRW Vietnam (2022, 2023)*
  - ○ **Technology**: Nextjs, Threejs, Frame-motion, SCSS, TailwindCss.
  - ○ **Time**: 1 member in 2 weeks
  - ○ **Description**:
    - ■ A company website that embraces rapid change and keeps up with the trends of young generations in utilizing AI in daily life:
    - ■ 2022: A virtual reality fireworks display, utilizing camera devices for live viewing. High user engagement and interaction rates. Fast loading speed, smooth performance, easy searchability, and accessibility.
    - ■ 2023: A company website with extensive effects and excellent user experience. Sensible component division for fast loading speed and smooth performance. Utilizing easily searchable and accessible keywords…

- *TMRW Singapore (2023)*
  - ○ **Technology**: Nuxt, Frame-motion, SCSS, TailwindCss.
  - ○ **Time**: 1 member in a week.
  - ○ **Description**:
    - ■ Redesign Blog UI for TMRW Singapore blog portion, an award winning digital creative agency.

- ■ Implemented new shopping interface for TMRW Singapore where users can now purchase coffee box from the website
- ■ Improved performance and smoother page loading.

Fiction (2022)
- ○ **Technology**: React js, Redux thunk, Frame-motion, SCSS, TailwindCss.
- ○ **Time**: 1 member in 4 weeks.
- ○ **Description**:
  - ■ A creative website with multiple features for studio booking.
  - ■ A simple, cohesive, and responsive interface optimized for mobile devices.

- ● *Ipossible (2022)*
  - ○ **Technology**: React js, Redux thunk, Frame-motion, SCSS, TailwindCss.
  - ○ **Time**: 1 member in 2 weeks.
  - ○ **Description**:
    - ■ An animated website that provides interactive experiences to enhance accessibility and entertainment (with scroll wheel as well as mouse action).
    - ■ Fast loading speed, smooth performance, easy searchability, and accessibility.

- ● *Sale Admin (2021)*
  - ○ **Technology**: React js, Redux thunk, Frame-motion, SCSS, TailwindCss.
  - ○ **Time**: 4 members in 6 months.
  - ○ **Description**: A real estate trading platform designed with a modern, professional, and user-friendly interface. With just a few simple clicks, customers can easily find comprehensive information about various types of real estate projects, ranging from prices to area, space, structure, and location. Additionally, the platform provides timely updates on the latest news and trends in the real estate market.

- ● *Super App for Sale admin (2021)*
  - ○ **Technology**: React js, Redux saga, SCSS, Bootstrap.
  - ○ **Time**: 2 members in 2 months.
  - ○ **Description**:
    - ■ A real estate buying and renting platform. Fast and smooth searchability. User-friendly and intuitive interface. Prompt and accurate updates on real estate information.
    - ■ SEO standard and fast, convenient searchability.

HIGHLIGHT SKILLS

Technical Skills:

- ● Languages: HTML5, CSS3, JavaScript
- ● Frameworks / Libraries: React.js, Next.js, Nuxt.js
- ● Styling: SCSS, CSS Preprocessing, Tailwind CSS, Bootstrap
- ● Animation & Interaction: GSAP, Motion UI, Three.js
- ● CMS: WordPress – custom themes, page builders (e.g., Elementor), basic plugin development
- ● Tools: Redmine, Jira, Postman, Notion, Git, GitHub Actions

Soft Skills:

- Self-motivated research
- Time Management
- Problem Solving
- Decision Making
- Strong Team Collaboration

Languages:

- Vietnamese (Native)
- English (Intermediate)
